Norphlet Chemical Inc. said it plans to begin production this week at a chemical manufacturing plant near [El Dorado](#).

The company said it will invest \$14 million in the new facility, which will employ 44 people at an average hourly wage of \$22. Norphlet plans to operate out of the former [MacMillan](#) Oil Refinery building, which sits on 92 acres.

"This is a great day for Norphlet and Union County," Gov. [Mike Beebe](#) said in a news release. "Norphlet Chemical's investment in southern [Arkansas](#) is one we hope to see repeated by other companies many times over in the near future. I congratulate the company and the leaders in Norphlet who worked so hard to bring good jobs to this community."

The plant will produce a chemical called R134A, which is a [refrigerant](#) used in automobiles.

The company said its main client is Tulstar Products Inc. of Tulsa, a global sourcing and distribution company that focuses on oil and chemical trading.
